

## Create digital codes

To verify your integration with the API, run through the following tests.

Test ID	Test Name	Test Case Detail	Expected Result
1	Creating a gift code	Initiate a <b>/CreateGiftCard</b> request for \$100.00 value and handle the response received.	You should receive a <b>SUCCESS</b> response. Your system should handle the SUCCESS response properly, based on the requirements.
2	Cancelling a gift code	Initiate a <b>/CancelGiftCard</b> request for the <b>creationRequestId</b> created in test (1).	You should receive a <b>SUCCESS</b> response. Your system should handle the SUCCESS response properly, based on the requirements.
3	Idempotency	Initiate a <b>/CreateGiftCard</b> request for \$1000.00 and handle the response received. Send another <b>/CreateGiftCard</b> request with the same <b>creationRequestId</b> .	You should receive a <b>SUCCESS</b> response and the same <b>gcId</b> and <b>claimCode</b> .
